

Scholar's Tea — User Guide

Quick reference for the AI floating assistant (Hermes) and the AI Workshop.

1. Hermes Floating Assistant

Hermes is the persistent AI companion that lives in the bottom-right corner of every page.

Open / Close

Action	Result
Click the avatar	Open chat panel
Click outside the panel or the minimize button	Close panel

Move the Avatar

Drag the avatar to any position on the page. Position is saved automatically.

Action Menu

Double-click or right-click the avatar to open a radial menu:

- **Encourage / Rest / Dance / Greet / Favorite / Study / Insight / Confused / Tea Party / Inspiration / Debate / Epiphany / Taste Tea / Random**

Tip: Click the avatar 3 times in a row for a "happy → wave → dance" combo.

Chat

- **Send message:** Type and press `Enter` (`Shift + Enter` for newline)
- **Upload image:** Click the `+` icon, press `Ctrl + V` , or drag-and-drop an image
- **Clear conversation:** Click the trash icon in the top-right

Personality Modes

Open the dropdown below the avatar in the chat panel to switch personality:

Mode	Style
Cute	Friendly and casual
Technical	Direct and precise
Mentor	Patient and explanatory
Analytical	Logic-driven
Creative	Imaginative
Professor	Academic and cited
General	Balanced default

Switching personality resets the conversation.

Admin Mode

Admins see an extra toggle at the top of the chat panel: **Community Manager** mode for community analytics.

Shortcuts

Shortcut	Action
Enter	Send message
Shift + Enter	Newline
Ctrl + V	Paste image

2. AI Workshop

Access via the top nav **AI Workshop** or directly by URL:

Mode	URL	Purpose
General	/workshop?mode=general	Everyday academic Q&A
Paper Assistant	/workshop?mode=paper	Paper analysis & abstract writing
Grant	/workshop?mode=grant	Grant proposal writing
Survey	/workshop?mode=survey	Literature review structure
Research	/workshop?mode=research	Feasibility assessment
Community	/workshop?mode=community_manager	Community analytics
Peer Review	/workshop?mode=peer_review	Paper peer review
Paper Generation	/workshop?mode=paper_generation	Full paper generation

Switch modes via the top selector. Changing modes starts a new conversation automatically.

Common Actions

Send a message

- Press `Enter` to send, `Shift + Enter` to add a new line
- Paste text or images directly into the input box

Upload a PDF

- Drag and drop a PDF into the chat area, or click the upload button
- Max size: 10 MB, max extracted text: ~30,000 characters
- In **Peer Review** mode, the PDF is processed in the background; other modes inject the text into your message

Start a new conversation

- Click **New Conversation** on the left sidebar

Copy code

- Hover over any code block → click the **Copy** button in the top-right corner

Retry on error

- If a response fails, a **Retry** button appears below the error message

Peer Review Mode

1. Select a review focus:
 - **Full Review** (default) — area, scores, pros, issues, suggestions
 - **Methods** — methodology and experimental design
 - **Writing** — logic, language, figures
 - **Suggestions Only** — P0/P1/P2 prioritized recommendations
2. Upload a PDF or paste the paper text
3. Click **Start Review**
4. Wait 60–120 seconds for the structured review report

Paper Generation Mode

1. Enter your research topic and background
2. Click **Start Generation** — the process runs through 5 stages:
 - i. **Proposal** — research question and innovation outline
 - ii. **Structure** — chapter plan and logic framework
 - iii. **Writing** — section-by-section content
 - iv. **Data / Figures** — data description and chart suggestions (supports uploading your own data images for visual analysis)
 - v. **Formatting** — final output in Markdown / LaTeX / plain text
3. Review each stage before proceeding to the next
4. Export the final paper

Grant Mode

The output is presented as an 8-step wizard:

Background → Research Content → Innovation → Feasibility → Expected Outcomes → Budget → Timeline → References

Use the top progress bar or step tabs to navigate between sections.

3. Markdown Support

AI outputs in the Workshop are rendered with:

- Headers (# to #####)
- Bold / italic / inline code

- Code blocks with copy button
- Bullet and numbered lists
- Task lists (- [x] / - [])
- Tables
- Alert boxes (> [!NOTE] , > [!WARNING] , > [!IMPORTANT] , > [!TIP] , > [!CAUTION])
- Collapsible sections (<details>)
- Auto-linked URLs

4. Notes

- Conversations are independent per session. Refreshing the page or clearing the chat resets the history.
- Logged-in users: conversation history is synced to the server.
- Guests: history is stored locally in the browser and will be lost if cache is cleared.
- Hermes is hidden on /admin , /profile , and /settings pages to avoid interference.
